

## Laboratory Report

### \*\* Amended Report \*\*

<b>Laboratory #:</b>	13350	<b>Call Name:</b>	Drum
<b>Order #:</b>	8692	<b>Registered Name:</b>	Drum
<b>Ordered By:</b>	Maria Amodei	<b>Breed:</b>	Border Collie
<b>Ordered:</b>	Jan. 31, 2016	<b>Sex:</b>	Male
<b>Received:</b>	Feb. 11, 2016	<b>DOB:</b>	May 2015
<b>Reported:</b>	Feb. 23, 2016	<b>Registration #:</b>	ABCA 420726
<b>Amended:</b>	Feb. 24, 2016	<b>Microchip #:</b>	AVID 835 602 593

### Results:

Disease	Gene	Genotype	Interpretation
Collie eye anomaly	<i>NHEJ1</i>	WT/WT	Normal (clear)
Degenerative myelopathy	<i>SOD1</i>	WT/WT	Normal (clear)
Intestinal cobalamin malabsorption (Border Collie type)	<i>CUBN</i>	WT/WT	Normal (clear)
Multidrug resistance 1	<i>ABCB1</i>	WT/WT	Normal (clear)
Neuronal ceroid lipofuscinosis 5	<i>CLN5</i>	WT/WT	Normal (clear)
Trapped neutrophil syndrome	<i>VPS13B</i>	WT/WT	Normal (clear)

WT, wild type (normal); M, mutant

### Interpretation:

Molecular genetic analysis was performed for six specific mutations reported to be associated with disease in dogs. We identified two normal copies of the DNA sequences in the mutations tested.

### Recommendations:

No mutations were identified. Thus, this dog is not at an increased risk for the diseases caused by or associated with the mutations tested. Because this dog is "clear" of these diseases, this dog will only pass the normal genes on to its offspring. Normal results do not exclude inherited mutations not tested in these or other genes that may cause medical problems or may be passed on to offspring. Paw Print Genetics™ has genetic counseling available to you at no additional charge to answer any questions about these test results, their implications and potential outcomes in breeding this dog.

*\*Note: At the client's request, this laboratory report and the accompanying Canine Genetic Health Certificate™ were amended on Feb. 24, 2016 to include the registered name for this dog.*

Associate Medical Director

Normal results do not exclude inherited mutations not tested in these or other genes that may cause medical problems or may be passed on to offspring. These tests were developed and their performance determined by Paw Print Genetics™. This laboratory has established and verified the tests' accuracy and precision. Because all tests performed are DNA-based, rare genomic variations may interfere with the performance of some tests producing false results. If you think these results are in error, please contact the laboratory immediately for further evaluation. In the event of a valid dispute of results claim, Paw Print Genetics will do its best to resolve such a claim to the customer's satisfaction. If no resolution is possible after investigation by Paw Print Genetics with the cooperation of the customer, the extent of the customer's sole remedy is a refund of the fee paid. In no event shall Paw Print Genetics be liable for indirect, consequential or incidental damages of any kind. Any claim must be asserted within 60 days of the report of the test results.
